

K-LOVE seves a vital function to myself and my family. They provide information and much needed clean, family-friendly music. They effect the community positively--no commercials, updates on local and national issues, important local needs, and a station where a parent does not have to worry about what their children might be exposed to. If K-love was replaced by a LPFM broadcaster providing other programming a big hole would be felt in our community. The service by K-Love provided by K-love is in the public interest because of the reasons listed above. We need stations that pertain to regional and national issues!!! Thank you for your time.
